

## SERVICE BULLETIN CONCERNING OVEN THERMOSTATS

The oven thermostat has changed on our BLODGETT, PLATINUM, and ULTIMATE RANGES. If the unit you are working is a standing pilot and has a thermopile you should now start using the new "rx milli-volt" thermostat. The part number is 1191727.

All standing pilot units built starting in August 2009 that are designed with thermopiles will automatically be equipped with the "rx milli-volt" thermostat.

This part has been added to the mandatory stock list. Please start stocking your shelves.

**\*\*\*IMPORTANT\*\*\***

This new thermostat will NOT work on units with the 120 volt ignition system.
